

B618

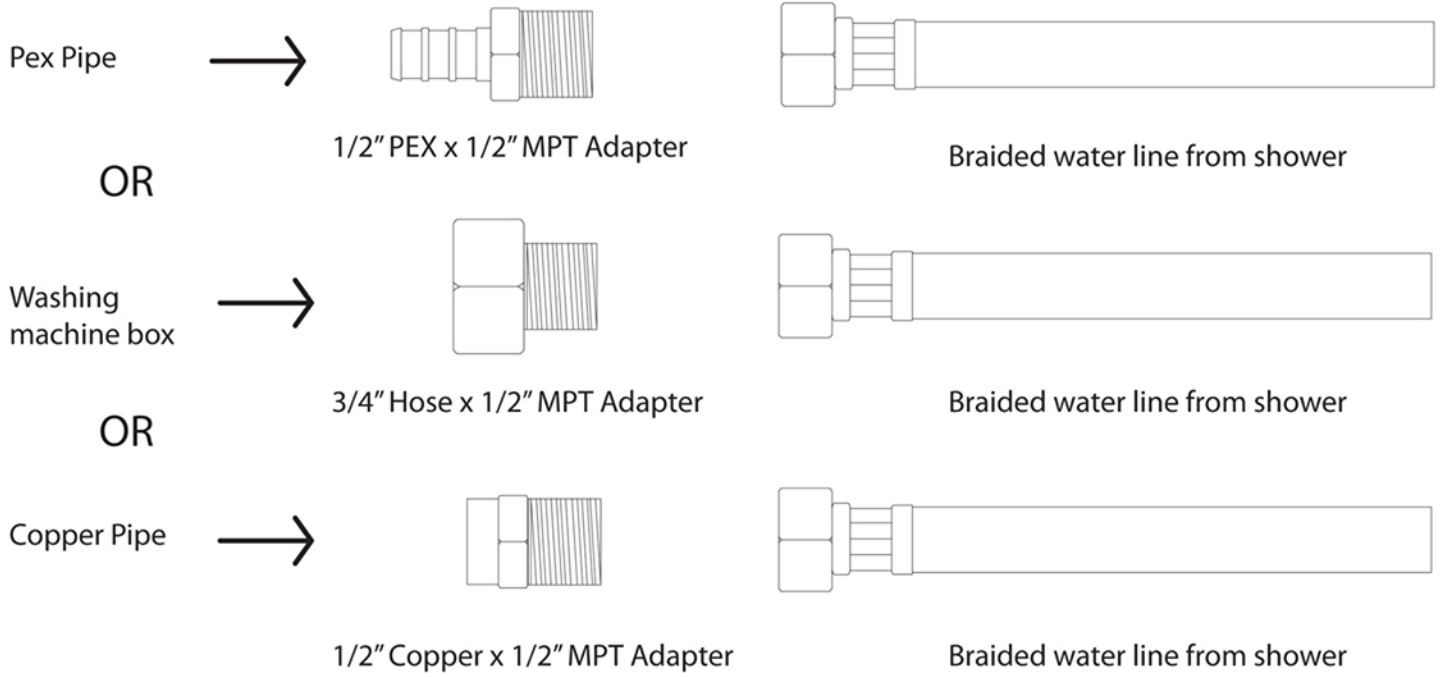

1650x880x2160

220-240V 20amp GFI breaker

1/2" MIP For hot and cold water lines

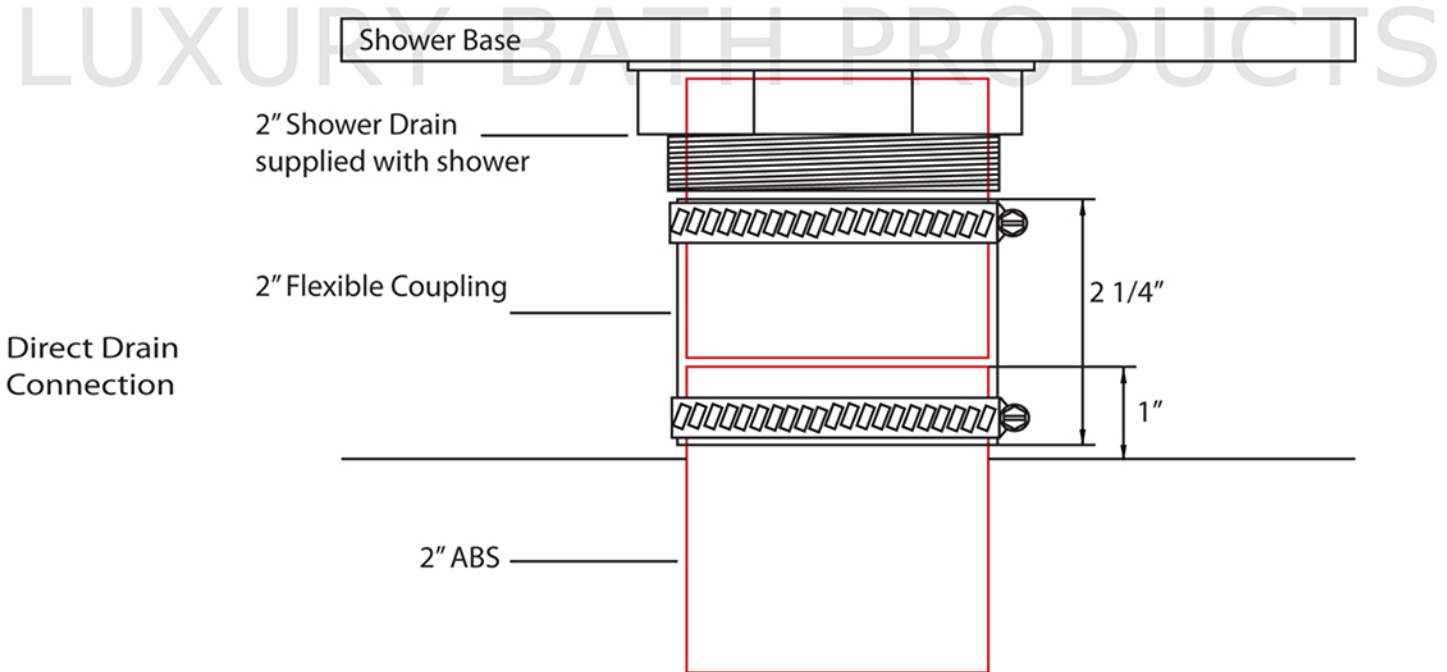

2" Drain

Water Line Connections

When running PEX lines stub them out as short as possible or angle them along the wall to ensure the unit has room to be moved into place, and to ensure the braided lines don't get kinked.

Drain Connection

Electrical Connection

This steam shower requires one 220-240V 20amp GFI circuit. The shower will be hardwired into this circuit using a junction box installed at the specified location on the previous page.
